## *Come Skype with Us*

For all of our long-distance patients, we invite you to Skype with us! This easy-to-use videoconferencing application will help us to stay better connected with you and see how you're doing. Skype between computers is free! So download, log on, and have your next appointment via video.

**Instructions:** You'll need a computer and a webcam

1. Download Skype for Mac or Windows for free from [www.skype.com](http://www.skype.com)
2. Follow the Setup Wizard
3. Open Skype on your computer
4. When the login box opens, click Don't Have a Skype Name
5. Create a Skype name and password
6. From the Contacts drop down menu, click on Add Contact
7. Enter your doctor's Skype name: DrTMartinez or DrJeffreyFriess
8. Highlight your doctor's name in the list when it appears and click Add Contact

### **Scheduling a Skype appointment:**

This works the same as with a phone appointment. Call our front desk and let us know that you'd like your next appointment to be by Skype instead. Be sure to give us your Skype username when you schedule!

### **At the time of your scheduled appointment:**

Open Skype on your computer and *your doctor will call you*. On occasion, our doctors may run a few minutes late. Just leave Skype open and wait for their videocall.

If you have any questions about the procedure, don't hesitate to call our front desk @ 406-541-8886.
